

We provide Data Privacy and Information Security consultancy, supported by our compliance management software, DataWise.

Compliance Review

Overview

The purpose of our compliance review is to identify areas of non-compliance in relation to privacy and information rights law including the General Data Protection Regulation [GDPR], Data Protection Act(2018) [DPA], Privacy and Electronic Communications Regulations (2003) [PECR], Freedom of Information Act [FOIA], and the Environmental Information Regulations (2004) [EIR]

How does it work?

Our consultant will review documentation off-site to gain an understanding of the data processing activities and to prepare for the on-site assessment. During this review we will also determine the extent to which the documentation meets the requirements of the legislation. This initial work is built on through a visit to your site(s) to test the extent to which your policies, processes and procedures are implemented and working effectively.

Why choose us?

We are specialists in Data Protection and Information Security. Our team has decades of practical experience and a proven track record of identifying and mitigating risks so you can be sure you are in the safest hands.

GDPR Advice

The on-site element of the gap analysis typically takes two days as our consultants are experienced in getting under the skin of operations and assessing compliance. They do this through conducting interviews, workshops and observation.

Who should you involve?

Time on site is usually spent with those responsible for information governance, IT, HR, and marketing. A facility tour is essential and we like to engage with operational teams to test their understanding of the organisation's policies and procedures.

Report

Within a few weeks of the site visit you will receive a comprehensive report of our findings. The report contains a section on each of your obligations; an overview of the obligation and our findings backed up by evidence collected during the assessment. We will highlight non-compliance, provide advice about how to bring the area into compliance and make recommendations as to how we think the area can be improved based on our extensive experience.

Action Plan

If required we will create an action plan setting out our recommendations into a prioritized time-table.
